

General Guidelines

- Use this template to prepare your proposal.
- Total acceptable length for the proposal: 5 pages, excluding references. Use Times New Roman Font, with 12 points, 1.15 line spacing. Use 2.5 cm margins on a 21.59 cm x 27.94 cm (letter) page size.
- Keep figures/tables embedded in the relevant section and provide proper legends. Figures and tables should be considered part of the proposal and must fit within 5 pages of proposal limit.

1. Application Information

Provide the following details at the start of your application:

- **Principal Investigator (PI):** Full name, degrees.
- **Co-investigator (if applicable):**
- **Institution:** Full institutional name.
- **Co-investigator's Institution:**
- **Project Title:** 250 characters maximum (including spaces).
- **Keywords:** Provide 10 keywords maximum which describes the proposal's key features.

2. Detailed proposal

Outline an introduction, proposal hypothesis, specific aims and methods, preliminary data (if available) and expected outcomes of each aim.

3. Research Tools, Models, and Resources

- Describe the data, models, cohorts, or resources you will use.
- Clarify whether data is existing or newly generated.
- Provide a table summarizing resources (e.g., cohorts, datasets, tools).

4. Impact Statement

- Describe how your study will advance the field. Highlight translational potential and implications for therapy or patient care.
- G-Can complies with The Neuro's Open Science policy. Indicate how results will be shared with the scientific community (e.g., open access, data portals).

References. (Excluded from 5 pages limitation).

Budget.
